

AI for Mediators

mediator
trAining

This is a fabulous introduction of AI into your mediation practice. Even if you are not tech savvy, this course enables you to use AI as a tool to help with drafting documents and providing options.

Johanne Thompson — Director of Foundation in Law & Senior Lecturer, University of Kent

Hunt ADR's AI for Mediators course is an ADR Professional CPD programme delivered in partnership with Business AI Studio. It is a practical, half-day session designed to give mediators the skills to use AI tools effectively, ethically, and safely in their professional practice.

Key Details:

Duration: Half day

CPD: 3.5 hours

Format: Interactive workshop with live demonstrations

Focus: Safe, effective AI use in mediation practice

Who is it for?

This course is suitable for practising mediators and ADR professionals who want to explore how artificial intelligence can support their preparation, analysis, and practice management, while remaining compliant with professional and ethical standards.

What will you learn?

- How AI can support case preparation and research
- Safe boundaries: what to automate and what never to outsource
- Practical demonstrations of AI tools for mediators
- Reality testing and scenario planning with AI assistance
- Building trust and transparency when using AI in mediation
